

Renaissance beams

the no mess "back from black" beam process

the "back from black" beam process...

...an applied process to give beams their natural look without the need for sand blasting, mechanical or chemical stripping with NO mess or need to redecorate or plaster repairs.

The process was developed by Penny several years ago and has since been refined to give greatly improved finishes.

The 3 coat process is applied directly onto the existing painted, stained or varnished beams (all coats consist of water based materials).

The finishes shown give a reasonable idea of the quality but photos do not do justice to the actual beams they do need to be seen to be believed.

If you would like to see an example of the process, more information or a quotation please contact us.

We will process a single beam, room or complete house.

For further information or to arrange a visit for a free no obligation quotation please contact me.
